MK 4673 MACKINTOSH BOTTLE RACK

INSTALLATION GUIDE

LEFROY BROOKS

IMPORTANT INFORMATION

Professional installation

We recommend that our products are fitted by a fully qualified professional. A tester should be used to ensure there are no hidden pipes or electrical cables where the product is to be mounted.

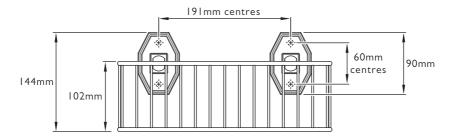

Wall fixings

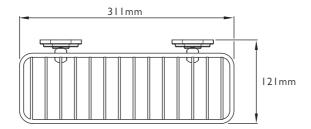

The screws and wall plugs provided are suitable for most brick walls. However, if the wall is constructed of plasterboard or soft building block the appropriate fixings should be used.

Water quality

In hard water areas, a suitable water treatment system should be provided to prevent limescale deposits (calcium deposits) which may effect the long term appearance of the product. Exterior surfaces should be gently wiped with a dry soft cloth after use to minimise water stains and limescale deposits.

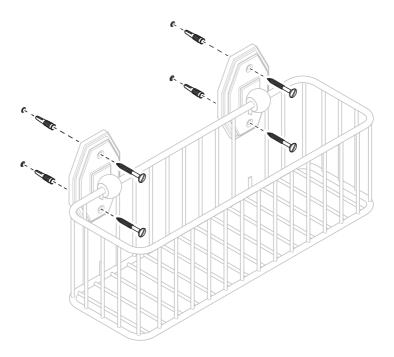

DIMENSIONS

Not to scale

INSTALLATION

- I Place the bottle rack against the mounting surface.
- 2 Mark the hole positions on the mounting surface. Use a spirit level to ensure the holes are level.
- 3 Drill holes using a suitably sized drill bit for the wall plugs supplied. If alternate fixings are to be used then drill holes to suit these fixings.
- 4 Insert the wall plugs into the holes.
- 5 Secure the bottle rack using screws.
